

Proposed Continuing Council Study Issue

Number DPW-01C
Status Pending
Calendar Year 2006
Title Engineering of a Borregas Avenue Bicycle Corridor
Department Public Works
Element or SubElement Land Use and Transportation

1. What are the key elements of the issue?

This project would create a north-south bicycle/pedestrian corridor, linking residents from the south and the Caltrain to businesses, recreational opportunities, and the light rail in the north. Currently bicyclists and pedestrians must either use Mathilda or Fair Oaks to get to North Sunnyvale, both of which carry high volumes of traffic at relatively high speeds. This project proposes to construct two bridges, one over US 101 and one over SR 237 at the Borregas Avenue alignment in order to create the bicycle corridor.

2. Current Status:

The design, environmental and engineering phases are underway. Issues to be resolved within 2006 include: Caltrans approval, bridge type selection, and environmental clearance.

3. Estimated work hours for completion of the study issue (use 5 or 8-hour increments)

Consultants	6066
Office of the City Attorney	15
